- PLEASE IGNORE this email if you have submitted:
- 1. Final camera ready paper
- Template: <http://iaescore.com/gfa/beei.docx>
- 2. Payment receipt
- 3. Similarity checking report by iThenticate or Turnitin

=====

Dear Prof/Dr/Mr/Mrs: Wilbert Wijaya, Joni W. Simatupang, David Tyler and Clementine Mavridis,

Congratulations!! Your paper entitled "Simulation Analysis of Equivalent Circuit Model of Skin- Electrode Impedance for Transcutaneous Electrical Stimulation", ID# 1570711088, authors: Wilbert Wijaya, Joni W. Simatupang, David Tyler and Clementine Mavridis for Bulletin of Electrical Engineering and Informatics has been ACCEPTED and will be published for forthcoming issue. The Bulletin of Electrical Engineering and Informatics (BEEI), ISSN: 2089-3191, e-ISSN: 2302-9285, <http://beei.org> is open to submission from scholars and experts in the wide areas of electrical, electronics, instrumentation, control, robotics, telecommunication, computer engineering, computer science, information system, information technology and informatics from the global world. This international journal is ACCREDITED (recognised) by the Ministry of Research, Technology and Higher Education, Republic of Indonesia (RISTEKDIKTI, Decree No: 60/E/KPT/2016) and indexed by Scopus (Elsevier)/ScimagoJR (SJR), SNIP 2019: 1.358 (SNIP=Source Normalized Impact per Paper measures actual citations received relative to citations expected for the serial's subject field), CiteScore 2019: 1.3, SJR 2019: 0.231; and ACCREDITED (recognised) by the Ministry of Research and Technology/National Agency for Research and Innovation, Republic of Indonesia (Decree No: 60/E/KPT/2016). Beginning with issue 1 of volume 9 (2020), BEEI is published as a bimonthly journal (6 issues/year).

For your information, according to international regulations, similarity score of camera-ready paper should be less than 25% (current similarity score is 86). Single author is NOT allowed. The Editor(s) will check whether the final version has been performed and already address the reviewers' comments or not. Failing to do proper revision may lead to the rejection of your paper.

Please submit your final camera ready paper and payment receipt to: tole@iaescore.com, cc: beei.org@gmail.com within 3 weeks.

I look forward for your response

Sincerely yours,
 Assoc. Prof. Dr. Tole Sutikno
 Editor-in-Chief,
 Bulletin of Electrical Engineering and Informatics
 email: beei@iaescore.com, beei@uad.ac.id
 website: <http://beei.org>
 Submit paper: <https://edas.info/N27818>

Please pay attention to double check your final camera ready paper:

(1) TEMPLATE, Please Strictly use and follow to the template Manuscripts (Word Format):
<http://iaescore.com/gfa/beei.docx>

(2) Authors are suggested to present their articles with IMRaD sections structure (outline): Introduction - The Proposed Method/Algorithm/Procedure specifically designed (optional) - Research Method - Results and Discussion - Conclusion. Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).

(3) Introduction section: explain the context of the study and state the precise objective. An Introduction should contain the following three (3) elements:
 - Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the-art of the field the report is about.

- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.

- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are cited to support this section.

(4) Method section: the presentation of the experimental methods should be clear and complete in every detail facilitating reproducibility by other scientists.

(5) Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. This is where the author(s) should explain in words what he/she/they discovered in the research.

(6) (URGENT)!!! About Figures & Tables in your manuscript:

- Because tables and figures supplement the text, all tables and figures should be REFERENCED in the text. Authors MUST EXPLAIN what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them, and leave the details for the reader to examine on her own.

- Tables are to be presented with single horizontal line under: the table caption, the column headings and at the end of the table. All tables are produced by creating tables in MS Word. Captured tables are NOT allowed.

- All figures MUST in high quality images

(7) Conclusion section: Summarize sentences the primary outcomes of the study in a paragraph. Are the claims in this section supported by the results, do they seem reasonable? Have the authors indicated how the results relate to expectations and to earlier research? Does the article support or contradict previous theories? Does the conclusion explain how the research has moved the body of scientific knowledge forward?

(8) Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3,4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5] or [4-8]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list. Examples of in-text citations:

This theory was first put forward in 1970 [9]."

Sutikno [10] has argued that...

Several recent studies [7], [9], [11-15] have suggested that...

...end of the line for my research [16].

(9) Please ensure the maximum page of your final paper is 8-page, but still allowed up to 12 pages (required to pay an extra fee).

Dear EiC,

This paper had been published in BEEI in August 2021. We have finished all the payments before it :)

Thanks.

Best wishes,

Joni Welman Simatupang, Ph.D

Electrical Engineering, President University
