**FACULTY OF COMPUTING
INFORMATION TECHNOLOGY STUDY PROGRAM
CIKARANG
SEPTEMBER, 2023**

PANEL OF EXAMINER APPROVAL

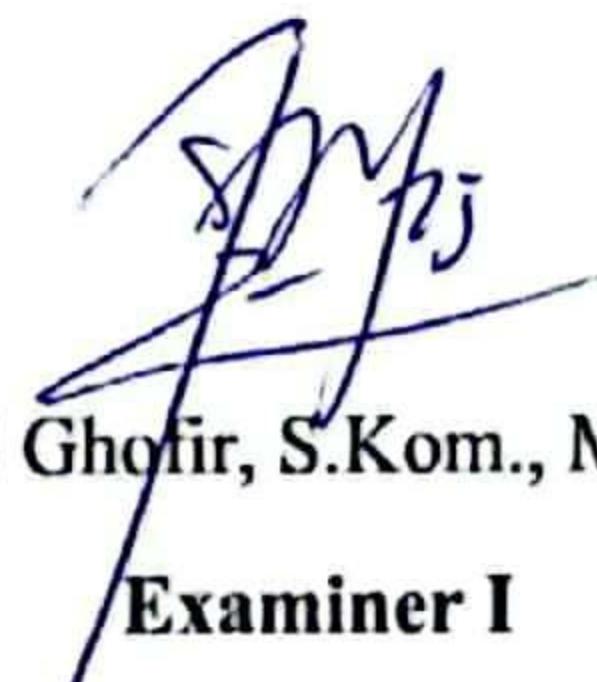

The Panel of Examiners declare that the undergraduate thesis entitled **EMERGENCY UNIT PREDICTION BASED ON USER INPUT USING NAIVE BAYES ALGORITHM** that was submitted by **Ichsanul Kamil Sudarmi** majoring in Information Technology from the Faculty of Computer Science was assessed and approved to have passed the Oral Examination on Wednesday September 21, 2023.

Panel of Examiner

Rusdianto Roestam, M.Sc, Ph.D.

Chair of Panel Examiner

Abdul Ghofir, S.Kom., M.Kom.

Examiner I

STATEMENT OF ORIGINALITY

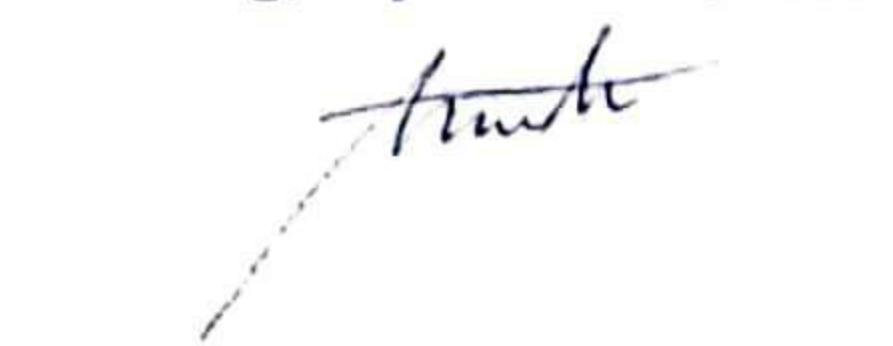

In my capacity as an active student of President University and as the author of the undergraduate thesis/final project/business plan (underline that applies) stated below:

Name : Ichsanul Kamil Sudarmi
Student ID number : 001201900001
Study Program : Information Technology
Faculty : Computing

I hereby declare that my undergraduate thesis/final project/business plan entitled "**EMERGENCY UNIT PREDICTION BASED ON USER INPUT USING NAIVE BAYES ALGORITHM**" is, to the best of my knowledge and belief, an original piece of work based on sound academic principles. If there is any plagiarism, including but not limited to Artificial Intelligence plagiarism, is detected in this undergraduate thesis/final project/business plan, I am willing to be personally responsible for the consequences of these acts of plagiarism, and accept the sanctions against these acts in accordance with the rules and policies of President University.

I also declare that this work, either in whole or in part, has not been submitted to another university to obtain a degree.

Cikarang, September 22, 2023

(Ichsanul Kamil Sudarmi)

SCIENTIFIC PUBLICATION APPROVAL FOR ACADEMIC INTEREST

As a student of the President University, I, the undersigned:

Name : Ichsanul Kamil Sudarmi
Student ID number : 001201900001
Study program : Information Technology

for the purpose of development of science and technology, certify, and approve to give President University a non-exclusive royalty-free right upon my final report with the title:

EMERGENCY UNIT PREDICTION BASED ON USER INPUT USING NAIVE BAYES ALGORITHM

With this non-exclusive royalty-free right, President University is entitled to converse, to convert, to manage in a database, to maintain, and to publish my final report. There are to be done with the obligation from President University to mention my name as the copyright owner of my final report.

This statement I made in truth.

Cikarang, September 22, 2023

(Ichsanul Kamil Sudarmi)

ADVISOR'S APPROVAL FOR PUBLICATION

As a lecturer of the President University, I, the undersigned:

Advisor's Name : Drs. Nur Hadisukmana, M.Sc.
NIDN : 20030900026
Study program : Information Technology
Faculty : Computing

Declare that following thesis:

Title of undergraduate thesis : Emergency Unit Prediction Based on User Input Using Naïve Bayes Algorithm
Undergraduate Thesis author : Ichsanul Kamil Sudarmi
Student ID number : 001201900001

will be published in journal / institution's repository / proceeding / unpublish

Cikarang, September 22, 2023

(Drs. Nur Hadisukmana, M.Sc.)

Your text is most likely human written

**There is a 41% probability this text was entirely written
by AI**

The nature of AI-generated content is changing constantly. As such, AI detection results should not be used to punish students. We recommend educators to use our behind-the-scene [Writing Reports](#) as part of a holistic assessment of student work. See our [FAQ](#) for more information.

Stats

Average Perplexity Score: 60.200

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 63.784

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "My gratitude to Kak Tia for her support.", has a perplexity of: 258

ABSTRACT

The Emergency Response App is a powerful software application designed to simplify the emergency response process and increase the efficiency of emergency service units such as Ambulance, Police, and Fire services. This application aims to provide a centralized platform for managing emergency events, dispatching appropriate units, and facilitating a quick and effective response to critical situations.

One of the main functions of this application is its ability to collect incident details, such as location, and type of emergency, through an easy-to-use interface. This information is then sent to a central system, where it is processed and analyzed to determine the most suitable response unit. By automating the incident reporting process, emergency services can significantly reduce response times and allocate resources more efficiently.

Additionally, the app uses advanced algorithms, including the Naive Bayes algorithm, to analyze event data and predict the right units to ship based on historical patterns and situational factors.

Security and confidentiality are especially important in applications that deal with emergency situations. The Emergency Response app implements strong security measures to protect sensitive data and ensure compliance with privacy regulations. User authentication and authorization mechanisms are implemented to limit access to only authorized personnel, thereby preventing unauthorized individuals from modifying critical information.

In conclusion, the Emergency Response App is revolutionizing the way emergency services operate by providing a centralized and efficient platform for managing emergency events. With incident reporting, unit allocation, real-time tracking, and data analysis features, this app empowers emergency response teams to provide fast and effective assistance in critical situations. By harnessing the power of technology, Emergency Response Apps contribute to saving lives and keeping communities safe by increasing the effectiveness of the overall emergency response system.

DEDICATION

I dedicate this final project to my parents, my brother, my sister, my little sister, my thesis supervisor (Mr. Nur), and my friends who always support me in any condition. Finally, for myself, I am very proud of myself who until now can still struggle and not easily give up until this final project is completed. Thank you, Allah, for helping me, strengthening me, and protecting me until now.

ACKNOWLEDGMENT

Initially, I express my gratitude to Allah SWT for consistently bestowing upon me good health, resilience, and convenience as You have. Subsequently, I extend my thanks to my own self for ultimately achieving the fulfilment of my final project. Thirdly, my appreciation goes to those who provided assistance throughout the course of my final project, aiding me in its successful culmination:

1. Overseeing my final project was Mr. Nur Hadisukmana, M.Sc., the individual who not only supervised but also offered guidance throughout its duration.
2. I am grateful to my dear parents, for their unwavering prayers and support.
3. Many thanks to Bang Hakim for his valuable support.
4. I extend my appreciation to Bang Ichlas for his support.
5. My gratitude to Kak Tia for her support.
6. Heartfelt thanks to Datin for her support.
7. Recognition goes to Mr. Rila Mandala Ph.D., the Dean of the Faculty of Computing, Mrs. Cutifa Safitri, M.Sc., Ph.D., who serves as the Program Head of Information Technology, Mrs. Indah, the Faculty of Computing's Secretary, and other educators who imparted extensive knowledge during my tenure at President University.
8. I'm indebted to my friends, who consistently aided my studies throughout college.
