**PARTIAL BLINDNESS ASSISTANCE USING IMAGE CAPTION GENERATOR
THROUGH USING TRANSFORMER AND TEXT-TO-SPEECH**

By
Jonathan Benedict Sirait

Approved:

Abdul Ghofir, S.Kom., M.Kom.
Final Project Advisor

Cutifa Safitri, Ph.D.
Program Head of Information Technology

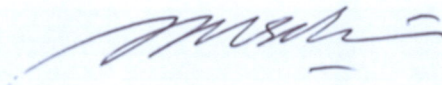

Rila Mandala, Ph.D
Dean of Faculty of Computing

PANEL OF EXAMINER APPROVAL

The Panel of Examiners declare that the undergraduate thesis entitled **PARTIAL BLINDNESS ASSISTANCE USING IMAGE CAPTION GENERATOR THROUGH USING TRANSFORMER AND TEXT-TO-SPEECH** that was submitted by **Jonathan Benedict Sirait** majoring in **Informatics** from the Faculty of Computer Science was assessed and approved to have passed the Oral Examination on Thursday September 21, 2023.

Panel of Examiner

RUSDIANTO ROESTAM

Chair of Panel Examiner

CUTIFA SAFITRI

Examiner I

STATEMENT OF ORIGINALITY

In my capacity as an active student at President University and as the author of the thesis/final project/business plan stated below:

Name : Jonathan Benedict Sirait
Student ID Number : 001201900022
Study Program : Information Technology
Faculty : Computing

I hereby declare that my thesis/final project/business plan entitled "**Partial Blindness Assistance using Image Caption Generator through using Transformer and Text-to-Speech**" is to the best of my knowledge and belief, an original piece of work based on sound academic principles. If there is any plagiarism detected in this thesis/final project/business plan, I am willing to be personally responsible for the consequences of these acts of plagiarism and will accept the sanctions against these acts in accordance with the rules and policies of President University.

I also declare that this work, either in whole or in part, has not been submitted to another university to obtain a degree.

Cikarang, 25th September 2023

(Jonathan Benedict Sirait)

SCIENTIFIC PUBLICATION APPROVAL FOR ACADEMIC INTEREST

As a student at the President University, I, the undersigned:

Name : Jonathan Benedict Sirait

Student ID Number : 001201900022

Study Program : Information Technology

for the purpose of development of science and technology, certify, and approve to give President University a non-exclusive royalty-free right upon my final report with the title:

Partial Blindness Assistance using Image Caption Generator through using Transformer and Text-to-Speech

With this non-exclusive royalty-free right, President University is entitled to converse, to convert, to manage in a database, to maintain, and to publish my final report. There are to be done with the obligation from President University to mention my name as the copyright owner of my final report.

This statement I made in truth.

Cikarang, 25th September 2023

(Jonathan Benedict Sirait)

ADVISOR'S APPROVAL FOR PUBLICATION

As a lecturer at the President University, I, the undersigned:

Advisor's Name : Abdul Ghofir, S.Kom., M.Kom.

NIDN : 0430128104

Study program : Information Technology

Faculty : Computing

declare that following thesis:

Title of thesis : Partial Blindness Assistance using Image Caption Generator
through using Transformer and Text-to-Speech

Thesis author : Jonathan Benedict Sirait

Student ID number : 001201900022

will be published in **journal / institution's repository / proceeding / unpublsh.**

Cikarang, 26th September 2023

(Abdul Ghofir, S.Kom., M.Kom.)

GPT ZERO PLAGIARISM DETECTOR RESULT

Readability: 15.6

Sentences with short words and low amount of syllables have high readability scores.

Percent SAT: 4.3 %

Measures what percentage of words are SAT words, terms from a standardized college admissions exam known for its labyrinthine vocabulary lists.

Simplicity: 34.2 %

Measures what percentage of words are in the 100 most common words in the English language.

Perplexity: 57.6

How familiar a piece of text is to large language models like ChatGPT.

Burstiness: 106.9

Unique score developed by GPTZero in 2022 that correlates to variance in writing. Humans generally vary their writing patterns over time.

Average Sentence Length: 24.0 words

Unique score that correlates to variance in writing, where humans generally vary writing patterns.

ABSTRACT

This project discusses the global issue of vision impairments and the WHO Global Report on Vision, emphasizing the significant number of avoidable impairments. It highlights the significant number of avoidable impairments and emphasizes the importance of taking action. The project presents data from the Rapid Assessment of Avoidable Blindness (RAAB) conducted in Indonesia from 2014 to 2016, indicating the prevalence of Moderate to Severe Visual Impairment (MRVI) in the population. It delves into the emotional impact of visual impairment, its effects on individuals, families, and society, and the broader consequences on independence, healthcare, employment, and quality of life. The project also acknowledges the potential benefits of AI/ML technology, specifically the Image Caption Generator combined with Text-to-Speech, in assisting individuals with impaired vision. It explains the chosen methodology, Rapid Application Development (RAD), and describes its four-step process of defining project requirements, user design, rapid construction, and cutover. The final part highlights the successful development of an Android application capable of generating captions from images using a transformer algorithm and providing text-to-speech functionality in English and/or Indonesian.

Keywords:

Vision impairments, Transformer, Image Caption Generator, Text-to-Speech, Rapid Application Development (RAD).

DEDICATION

I would like to dedicate this final project to my family and my friends who have assisted me and given me the support and motivation to finish this final project. I hope that this research will be beneficial for educational purposes and the advancement of the academic sector.

ACKNOWLEDGMENTS

I would like to imply my gratitude to:

1. Lord, Jesus Christ, for His presence, grace, and blessings that has given me the power to successfully complete this project and report.
2. My parents and my siblings, who always be my fundamental support system and encouragement toward this final project process.
3. Mr. Abdul Ghofir, as my advisor to do this final project. Thanks for all of the advices and following me up every time from the beginning of my final project.
4. Mrs. Rosalina, as my academic advisor who always be like a mom during my university life by providing motivation to accomplish my degree.
5. Ms. Cutifa Safitri, as my Head of Major who support me by generously giving me another chance to complete my final project.
6. All of computing lecturers, who gave me the knowledge and experience in President University since I was in the first year and teach us the lesson.
7. All of my friends who supported me in the development of this final project
