Program Head of Informatics

Rila Mandala, Ph.D.
Dean of Faculty of Computing

STATEMENT OF ORIGINALITY

In my capacity as an active student at President University and as the author of the final project stated below:

Name : T. IKHMANUL HAKIM

Student ID number : 001202000004

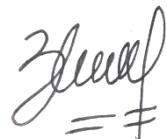

Study Program : Informatics

Faculty : Computer Science

I hereby declare that my final project entitled "**KIM-SHOP: A Technopreneur Web-based Application for Purchase Ordering using MapBox and Djikstra Algorithm**" is to the best of my knowledge and belief, an original piece of work based on sound academic principles. If there is any plagiarism detected in this final project, I am willing to be personally responsible for the consequences of these acts of plagiarism and will accept the sanctions against these acts in accordance with the rules and policies of President University.

I also declare that this work, either in whole or in part, has not been submitted to another university to obtain a degree.

SCIENTIFIC PUBLICATION APPROVAL FOR ACADEMIC INTEREST

As an academic community member of the President's University, I, the undersigned:

Name : T. IKHMANUL HAKIM

Student ID number : 001202000004

Study program : Informatics

for the purpose of development of science and technology, certify, and approve to give President University a non-exclusive royalty-free right upon my final report with the title:

“KIM-SHOP: A Technopreneur Web-based Application for Purchase Ordering using MapBox and Djikstra Algorithm ”

With this non-exclusive royalty-free right, President University is entitled to converse, to convert, to manage in a database, to maintain, and to publish my final report. There are to be done with the obligation from President University to mention my name as the copyright owner of my final report.

This statement I made in truth.

Cikarang, 2023

ADVISOR APPROVAL FOR JOURNAL/INSTITUTION'S REPOSITORY

As an academic community member of the President's University, I, the undersigned:

Name : Cutifa Safitri, Ph.D.

ID number 20190900815

Study program : Informatics

Faculty : Computing

declare that following thesis:

Title of thesis : **KIM-SHOP: A Technopreneur Web-based Application
for Purchase Ordering using MapBox and Djikstra
Algorithm**

Thesis author : T. IKHMANUL HAKIM

Student ID number 001202000004

will be published in **journal / institution's repository / proceeding / unpublished.**

Stats

Average Perplexity Score: 189.797

A document's perplexity is a measurement of the randomness of the text

Burstiness Score: 336.750

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "Order item product.", has a perplexity of: 1848

ABSTRACT

kpop is very global nowadays, many fans around the world listen to k-pop music and even buy merchandise related to their idols. in early 2020 we were affected by something called covid-19, and at that time kpop fans around the world were increasing. because by doing it online, many people increasingly want to enter the world of k-pop. we know that everything k-pop must be related to the name Korean. With this problem, many international fans still find it difficult to buy merchandise for their idols because the distance is very far, and when they want to buy merch, they have difficulty finding the website because the website is mostly in Korean and the payment system is very difficult. With this problem, as developer want to create a website-based application to buy merchandise which is very easy, especially for Indonesia. The developer created this project using the Dijkstra algorithm to allow buyers to check the closest store to the user's location, so users do not have to spend a lot of money to pay for shipping and taxes because shipping is from different countries.

DEDICATION

I dedicated this final project to my mother, my father, my sister and my brother and the last for all my family.

ACKNOWLEDGEMENT

First, I want to thank Allah SWT, because of His grace I was able to complete this final project. And I also want to thank the following to:

1. My beloved mother, father, sister and my brother who always support to me, and gave me enthusiasm while doing lectures at President University.
2. My final project advisor, Cutifa Safitri, Ph.D. thank you for guiding me while working on this final project to completion.
3. All computing lecturers who have taught me a lot of knowledge and also gave advice to me while studying at President University.
4. All my friends during the internship period, thank you for your support, I was able to finish this and also valuable experience during the internship.
5. for all my friends in college. thank you for always supporting me and also the experience.
6. For Mr Kenny and Mr.vicky as my senior thank you for helping me in this project, and thanks fo the support to.
7. for blackpink jisoo, jennie, rosie and lisa. Thank you for being a good public figure. Because of you guys I have the inspiration to make this project.
