## ABSTRACT

Employee Portal works as a strategic tool for promoting corporate culture and alignment through information and communication fluxes and also through the teamwork of collaborative functionalities [18]. Aleph Labs Indonesia as a creative engineering company in the IT Services and IT Consulting industry with more than 140 employees also have an internal portal called Aleph Connect which was developed with the initial goal for employees to access their personal info and learn about other employees as they can sneak peek at their colleagues' profiles. However, the current Aleph Connect has shortcomings in terms of user experience, functionality, and information quality. Therefore, this final project will discuss the improvement of Aleph Connect through website development and information enhancement, so that the important information related to the company and employees is integrated into one system, and employees can access their personal info and get to know their colleagues with a better experience.

**Keywords:** Employee portal, website development, employee relationship management, user experience, functionality, information quality.

# **DEDICATION**

The author devotes this final project to President University,

The author's parents,

And the Information System industry.

## ACKNOWLEDGEMENT

Praise Allah SWT that has given the author blessings, favor, and strength throughout the process of working on this final project; from the beginning until the author can properly finish this final project on time.

Other than that, this final project would not have been completed without the support and prayers of the author's family and guidance from various parties. Thus, with the completion of this final project, the author would like to thank:

1. Sir Hadi Suprayitno, S.Kom., MM as the final project advisor who has guided the author through the process of working on this final project.
2. The author's parents who have given her support, courage, and strength from the beginning of the university year until the author is able to finish her undergraduate study.
3. The author's sister and best friends as her place to whine and talk about her difficulties throughout working on the final project.
4. Aleph Labs Indonesia which has given the author opportunity to work while working on her final project, has allowed the author to use Aleph Connect as her final project topic, and has given the author the information needed during working on the final project.
5. The author's dormitory friends, classmates, and information system colleagues, as well as the AIESEC team who have made the author's university life nothing but a pleasure and unforgettable memories.
6. Support from various parties that the author cannot list one by one.
