ABSTRACT

Software applications are essential tools that aid individuals in various tasks, particularly in the execution of business processes. This fact motivated to build the system for Afkar store, the type of store is a retail store because providing any products that for customers who want buy with medium until small quantity and as the store was still using manually methods to manage its operations, it means the store need any tool specifically use software help to support business. The system created with having purpose to made an increasing demand for efficient sale has led to the developing the systems. That was designed to offer a straightforward and user-friendly interface to make who user easy to use it, all of it made efficient process management and real-time reporting capabilities. The system built with website platform which has allowed for smooth openly with every device but that can open a browser and for any users can use it with convenient felt but of course, this project is has contribute with existing body of research on POS system, which is by providing any practical solution for retail business seeking to streamline for their management processes. However, with the potential for growth and increasing demand for the store, this project provides a valuable opportunity for the store to take much advantage of technological advancements that have made business operations can grow well and keep up with this modern era.

DEDICATION

With deep gratitude to God for the opportunity to undertake this final project, I present my work as its author, dedicate the following individuals who have contributed significantly:

1. First and foremost, I extend my sincere appreciation to my parents, particularly my father and mother, for their unwavering support, motivation, and prayers during I was take my final project. Their encouragement enabled me to remain focused and committed to completing this task, and without their support, I may not have been able to finish.

2. I also wish to extend my gratitude to my friends include from on campus also kiseki no sedai as well and my seniors, all of them who have provided me with valuable insights and support throughout this endeavour, particularly when I faced difficulties in generating ideas. Their input has helped me to develop creative solutions and ideas for my final project.

ACKNOWLEDGMENT

Firstly, I would like to express my gratitude to Sir Genta Sahuri for his exceptional guidance as my thesis advisor. His patience and willingness to provide advice and support have been instrumental in my ability to complete this project. I consider myself fortunate to have had such an experienced and knowledgeable advisor, and his contributions have been invaluable to the success of my final project.

I would like to extend my gratitude to my family for their unwavering support and prayers during my final project. Without their encouragement, I would not have been able to complete this. I am reminded of the power of family, particularly the love and guidance provided by parents, who always wish for their children's success and well-being.

Lastly, I express my gratitude to Allah SWT for his divine assistance in helping me overcome the various obstacles that I faced during this project. I am grateful for His guidance and for the alternative paths He provided when I encountered difficulties. I attribute the success of my final project to His grace and blessings, and I am humbled by His continued support.
