

**MINIMIZING DEFECT USING DMAIC METHOD  
IN PACKAGING PRINTING PROCESS AT PT. X**

**UNDERGRADUATE FINAL PROJECT**

**Submitted as one of the requirements to obtain Sarjana Teknik (S.T.)**

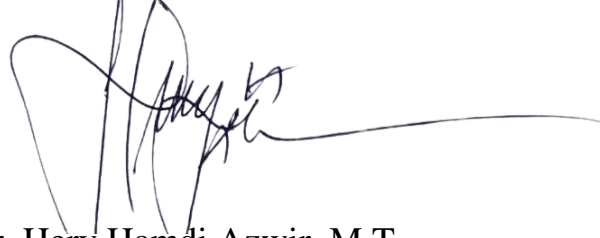

**By  
Listiyanti Puspa Agustina  
ID No. 004201900005**

**FACULTY OF ENGINEERING  
INDUSTRIAL ENGINEERING STUDY PROGRAM  
CIKARANG  
SEPTEMBER, 2023**

## **PANEL OF EXAMINER APPROVAL**

The Panel of Examiners declare that the undergraduate final project entitled **Minimizing Defect Using DMAIC Method in Packaging Printing Process at PT. X** that was submitted by **Listiyanti Puspa Agustina** majoring in Industrial Engineering from the Faculty of Engineering was assessed and approved to have passed the Oral Examination on September 19<sup>th</sup>, 2023.

### **Panel of Examiner**

Ir. Hery Hamdi Azwir, M.T.

**Chair of Panel Examiner**

Ir. Adi Saptari, M.Sc., Ph.D

**Examiner I**

## **FINAL PROJECT ADVISOR RECOMMENDATION LETTER**

This final project entitled “**Minimizing Defect Using DMAIC Method in Packaging Printing Process at PT. X**” prepared and submitted by **Listiyanti Puspa Agustina** in partial fulfillment of the requirements for the degree of Bachelor Degree in the Faculty of Engineering has been reviewed and found to have satisfied the requirements for a final project fit to be examined. I therefore recommend this final project for Oral Defense.

**Cikarang, Indonesia, September 15<sup>th</sup>, 2023**

**Andira Taslim, S.T., M.T.**

## STATEMENT OF ORIGINALITY

In my capacity as an active student of President University and as the author of the the thesis/final project/business plan stated below:

Name : Listiyanti Puspa Agustina  
Student ID number : 004201900005  
Study Program : Industrial Engineering  
Faculty : Engineering

I hereby declare that my final project entitled “**Minimizing Defect Using DMAIC Method in Packaging Printing Process at PT. X**” is to the best of my knowledge and belief, an original piece of work based on sound academic principles. If there is any plagiarism detected in this final project, I am willing to be personally responsible for the consequences of these acts of plagiarism, and will accept the sanctions against these acts in accordance with the rules and policies of President University.

I also declare that this work, either in whole or in part, has not been submitted to another university to obtain a degree.

Cikarang, Indonesia, September 19<sup>th</sup>, 2023

Listiyanti Puspa Agustina

## **SCIENTIFIC PUBLICATION APPROVAL FOR ACADEMIC INTEREST**

As an academic community member of the President's University, I,  
the undersigned:

Name : Listiyanti Puspa Agustina  
Student ID number : 004201900005  
Study Program : Industrial Engineering

for the purpose of development of science and technology, certify, and  
approve to give President University a non-exclusive royalty-free right  
upon my final report with the title:

**“Minimizing Defect Using DMAIC Method in Packaging Printing  
Process at PT. X”**

With this non-exclusive royalty-free right, President University is  
entitled to converse, to convert, to manage in a database, to maintain,  
and to publish my final report. There are to be done with the obligation  
from President University to mention my name as the copyright owner  
of my final report.

This statement I made in truth.

Cikarang, Indonesia, September 19<sup>th</sup>, 2023

Listiyanti Puspa Agustina

**ADVISOR APPROVAL FOR  
JOURNAL/INSTITUTION'S REPOSITORY**

As an academic community member of the President's University, I, the undersigned:

Name : Listiyanti Puspa Agustina  
Student ID number : 004201900005  
Study Program : Industrial Engineering  
Faculty : Faculty of Engineering

declare that following final project:

Title of final project : Minimizing Defect Using DMAIC Method  
in Packaging Printing Process at PT. X  
Final project author : Listiyanti Puspa Agustina  
Student ID number : 004201900005

will be published in **journal/institution's repository**

Cikarang, Indonesia, September 19<sup>th</sup>, 2023

Andira Taslim, S.T., M.T.

**MINIMIZING DEFECT USING DMAIC METHOD IN  
PACKAGING PRINTING PROCESS AT PT. X**

# AI BASED PLAGIARISM CHECKING RESULT

## Stats

**Average Perplexity Score: 409.114**

A horizontal progress bar with a dark grey fill on the left side, representing approximately 40% of the total length.

A document's perplexity is a measurement of the randomness of the text

**Burstiness Score: 843.597**

A horizontal progress bar with a dark grey fill on the left side, representing approximately 80% of the total length.

A document's burstiness is a measurement of the variation in perplexity

Your sentence with the highest perplexity, "*Panel of Examiner Jr.*", has a perplexity of: 4224

## **ABSTRACT**

PT. X is a company engaged in manufacturing flexible film packaging. In making packaging product through several processes, namely printing, lamination, slitting and sealing processes. The problem faced by the company is the high percentage of defects in January 2023 for the entire process, which is 7.17%. Whereas the defect standard for the entire process is 5%. The printing process produces the highest defect percentage of 4.56% when compared with other processes. The six sigma method with DMAIC stages is used to improve the quality of printing process to minimize defects in the process. Start from defining the problem using pareto diagram, SIPOC diagram, and critical to quality. Measuring current data using p-chart, DPMO, and sigma level to find out the performance level of current conditions. Analyze the root causes of defects using why why analysis. Develop suggestions for improvement using the 5W1H method. Lastly, determine the control process for implementation of improvements. After the implementation of improvement, the defect percentage in the printing process decrease become 1.72% in March 2023.

*Keywords: Packaging, Printing, Defect, Quality, Six Sigma, DMAIC*

## **ACKNOWLEDGEMENT**

The name of Allah S.W.T., the most Gracious and most Merciful, all praises be to Allah who has given love and mercy in completing the final project, the one that makes everything possible. This final report will not be fully and successfully finalized without great encouragement and motivation around me. Therefore, I would like to express my greatest gratitude to:

1. Myself, who can be called Wina or Listi. Thank you for trying and staying enthusiastic even when you are tired. Good job Wina!
2. My family, Pak Ikin, Bu Titin, Teteh Wida, Hani, and my cat, Chio. Thank you for always support me in every single moment in my life and make me happy.
3. Ma'am Andira Taslim as final project advisor and study program head of industrial engineering, thank you for guiding and helping me until I finished my final project.
4. All of the people in Research and Development, Quality Control, and Production department at PT. X especially printing section.
5. All of the Industrial Engineering lecturers that I cannot mention one by one without reducing my respect, thank you for the knowledge during my lectures.
6. All friends of Industrial Engineering batch 2019, thank you for everything.

## LIST OF TERMINOLOGIES

Packaging	: A package that protects products from physical damage, contamination, and other environmental factors.
Printing	: A process of transferring designs in the form of images from cylinder to a film substrate.
Defect	: Product quality conditions that do not meet standards or below the level expected by customers.
Article	: The name of the customer's product that will be used as an identity by PT. X during the packaging process.
Running Process	: A series of stages carried out during the product production process.
Change Over	: The process of changing production activities from one article to another.
Surat Uraian Produksi (SUP)	: Documents contain product information, specifications, and process parameters in accordance with established standards to produce products with the expected quality.
Form Cylinder Selesai Proses (FCSP)	: Document containing information on the use of cylinders that have been used with conclusions about the quality of the cylinders during the printing process.
